

INTERNATIONAL SCIENTIFIC CONFERENCE

MULTILEVEL GOVERNANCE IN EDUCATION: TOP-DOWN GOVERNANCE, TRANSFER OF AUTHORITY AND REGIONAL COOPERATION

MOSCOW

NOVEMBER 12-13, 2018

DEAR COLLEAGUES!

We're pleased to welcome you to International Scientific Conference 'Multilevel Governance in Education: Top-Down Governance, Transfer of Authority and Regional Cooperation'.

Discussions on reallocating of powers between different levels of public authority in the field of education have become prominent in Russia. Different ideas have been raised in the public discourse – from 'democratic centralism', which keeps the center of decision-making at the federal level, to transfer of powers to regional level. International practice shows us that effective governance of the education system, disregarding political and economic situation in the country, should be compliant with some general principles.

Discussions of Russian and international researchers and practitioners in the field of education will be centered on these topics:

- Multilevel governance of the education systems;
- Powers of different levels of public authority for effective governance and functioning of education system;
- The legal status and role of Ministries of education in the governance of education at various levels of public authority;
- The formal and real impact of central (federal) government on the educational system;
- The importance of non-governmental organizations for the education system;
- Horizontal cooperation in education. Interregional and intermunicipal projects: best practices, barriers, development prospects.

We hope that the Conference will become a platform for productive discussion, dialogues with like-minded people and a source of new ideas!

With kind regards,
Programme Committee of the Conference
